Art Unit: 1616

Claims 55-96 are pending in this application.

Restriction to one of the following inventions is required under 37 CFR 1.499, 37 CFR 1.475 and PCT Rule 13, because this national stage application lacks unity of invention.

- I. Claims 55-95, drawn to composition and method for repelling molluscs, wherein a substantially insoluble metal oxalate is utilized.
- II. Claim 96, drawn to a composition for repelling molluscs, wherein an aqueous solution of oxalic acid (soluble) or soluble metal oxalate + soluble metal salt is utilized.

The invention of Group I lacks unity of invention with the invention of Group II because the inventions are not so linked to form a single general inventive concept. Group I utilizes substantially insoluble metal oxalates, whereas Group II utilizes the soluble oxalic acid and soluble oxalates, in addition to other soluble metal salts. Therefore, there is no corresponding special technical feature between the two inventions. The technical feature that Group I may make over the prior art, i.e. use of substantially insoluble metal oxalates, is opposite to the technical feature that Group II may make over the prior art, i.e. use of soluble oxalates and soluble oxalic acid. For these reasons the claims of this application lack a unity of invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
